

# [English] Version 2.3.4

- Aura now stops sending messages when my Twitch channel is live. Messages will still be announced in the live channel though.
- Database code optimization
- Role distribution when a user joins a server

## Enable role distribution:

```
0!settings Rolle_bei_Beitritt <True/False>
```

## Role distribution:

```
0!settings Rollen_ID <rollen id>
```

*How to get the ID of a role?*

[More here.](#)
